WHEN IS THE BEST TIME?

Spring Run off and high-water season
Late May to early June

Summer Sun, fun and consistent water level
June through July

Fall Lower water levels usually - technical boating. Relax and get away from the crowds August through September.

"MOTHER NATURE" is still in control out West, so please realize that we cannot control her weather patterns or the water flows. But we can recommend all things to make your trip a well prepared for and comfortable experience regardless of the changes that may occur. We reserve the right to change river sections, move to adjacent rivers or postpone the trip if water levels, weather conditions or circumstances arise which are beyond our control. Client river skills and abilities can also determine whether a particular river or trip are substituted.
